

# FRACTION FUN

$\frac{1}{3}$

$\frac{2}{3}$

$\frac{1}{4}$

$\frac{3}{4}$

When we talk about parts of a fraction, we use two numbers.

The top number is the amount of pieces we are looking at.

The top number is called the numerator.

The bottom number is the total number of pieces.

The bottom number is called the denominator.

Each piece of the fraction must be exactly the same size.
